DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I, claims 16-29 and 31-32 in the reply filed on February 12, 2010 is acknowledged.

The traversal is on the ground(s) that Groups I and II are closely related and that a proper search of any of the claims should, by necessity, require a proper search of the others. Thus, Applicants submit that all of the claims can be searched simultaneously, and that a duplicative search, with possibly inconsistent results, may occur if the restriction requirement is maintained.. This is not found persuasive because a search for group I does not require a search for the sequence of steps recited in claim 30 of group II. Therefore, a search for group I does not include a proper search for the process of group II.

The Applicant further argues that section 803 of the MPEP requires that if "the search and examination of all the claims in an application can be made without serious burden, the examiner must examine them on the merits, even though they include claims to independent or distinct inventions". Therefore, it is not mandatory to make a restriction requirement in all situations where it would be deemed proper. This argument is not persuasive since a search for the process steps of group II is not required in a search of the composition recited in group I. Therefore, it would be a serious burden on the Examiner to have to search both classes/subclasses for the

Art Unit: 1797

claimed composition of group I and separate classes/subclasses for methods of using the compositions in group II.

The requirement is still deemed proper and is therefore made FINAL. Claim 30 is withdrawn from consideration for being directed to a non-elected invention.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 16-29 and 31-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 16 recites, in lines 2-4, that the "tagging units are units $\underline{\text{deriving}}$ from a monomer having the following formula: $X_2C=CYY'$,". However, the claim fails to disclose any specific chemical compounds that are the tagging units.

More specifically, the claims, as well as the specification, fail to disclose any specific types are examples of tagging units that are derived from the claimed formula. Therefore, it is unclear as to the exact types of tagging units which are derived from the claimed formula $X_2C=CYY'$. As such, the Examiner cannot determine which chemical compounds or structures are included or excluded from claim 16 and thus a proper search cannot be conducted.

Application/Control Number: 10/562,052 Page 4

Art Unit: 1797

Claims 17-29 and 31-32 are rejected for the same reasons applied to claim 16 above, sine they depend form and include all of the limitations of independent claim 16.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean E. Conley whose telephone number is 571-272-8414. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
